Top-Notch Features

Register/Login

Brokers can register to the mobile app using mail IDs or social media credentials.

Profile Verification

Brokers need to verify their profiles to maintain the authenticity of the app, helping them connect with the customers.

Search Property

Users can now search for the desired property, making it easy for brokers to locate the available property.

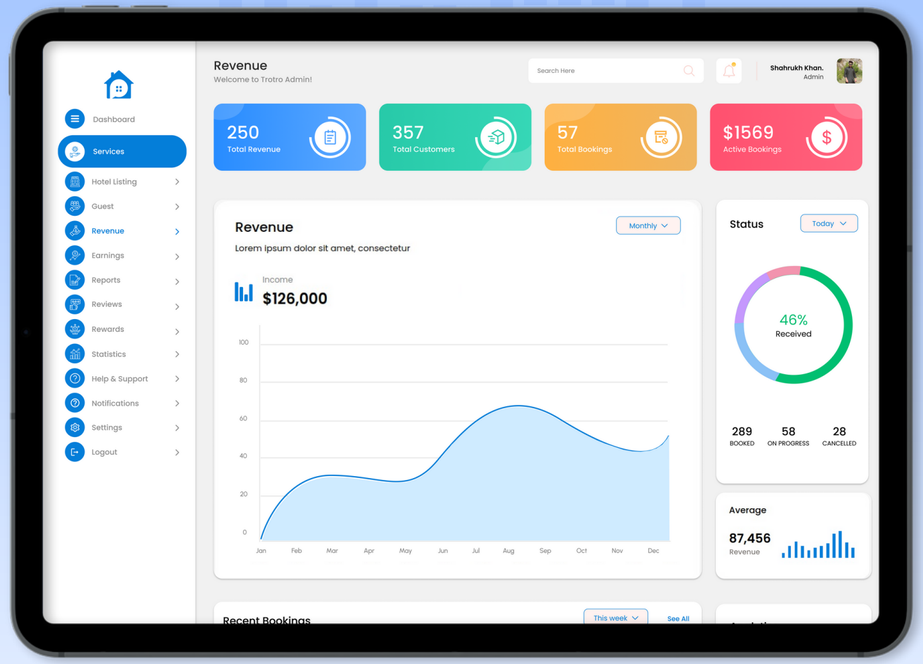
Filter Property

Hosts are allowed to filter and sort their search based on their requirements.

toXSL

Filter Property

Hosts are allowed to filter and sort their search based on their requirements.



Map or List View

Users can choose between map or list view as per preference while going through property listings & checking the current status of any property

Property Details

Users can ask hosts for the details of the property they are willing to buy.

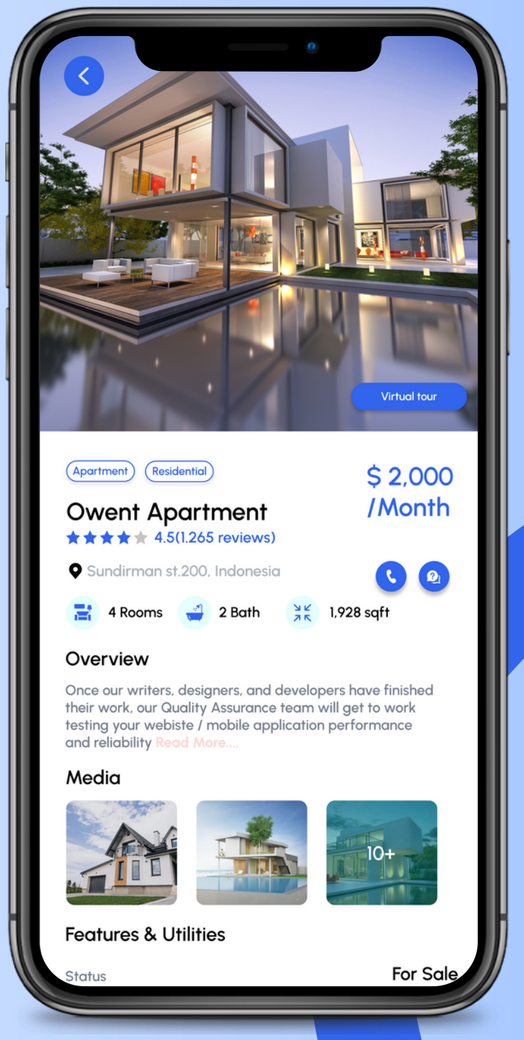
Add Your Property

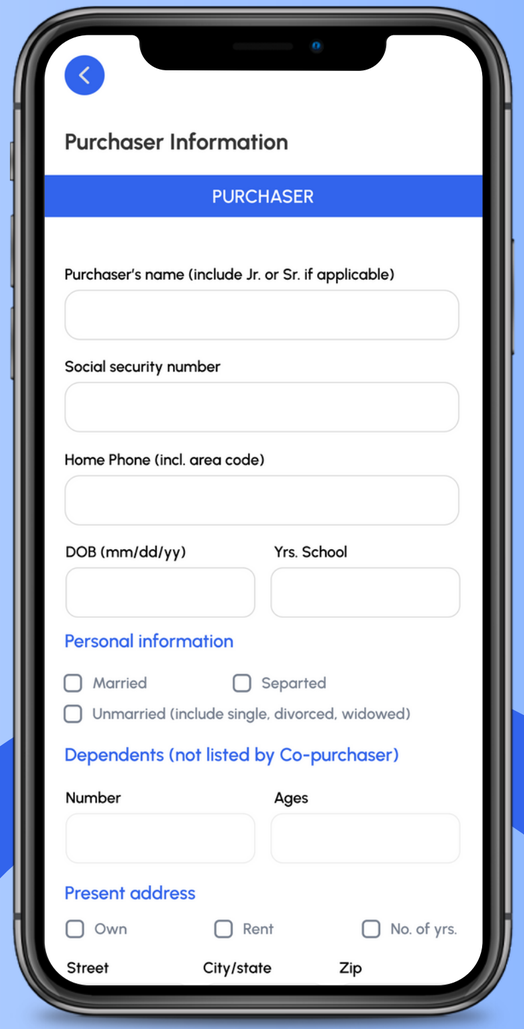
Sellers are allowed to add the property that they are willing to sell or put on rent.

toXSL

USER APP

Advanced and robust dashboard attract more users and makes the buying or selling process easy and efficient.





toXSL

Top- Notch Features

Login/Signup

Users are asked for the details and a verification code before registering. It is crucial for users to have their own personal accounts.

Property Profiles

Get extensive information about the property such as descriptions, photos, videos, value, owner details, rich media, price, etc.

Filters and Categories

Advanced filter and category search options help the user locate properties that suit their need.

Favourites Property

Add the most preferred properties to the favourite list. If users like the property then this helps business owners get some marketing.

Calendar

Synced calendar helps customers to stay updated like which property was viewed on which data and remember property visits.

Broker Details

Contact the broker of the desired property easily and conveniently.

toXSL

Push Notifications

Allow users to stay updated by sending them timely pop-up messages.

Seller Contact

Buyers are allowed to contact sellers via email or inquiry message.

Location Tracking

Users can get the location of the property, helping them decide if they want to buy it or not.

MLS Integration

Get the various list of categories on the app for a better understanding of the availability of properties.

Mortgage EMI Calculator

Users can use a calculator to calculate the EMI that they have to pay against a loan on the property.

Payment Integration

Multiple in-app payment methods are used to help users purchase subscriptions.
