1 Introduction

1.1 Background

School ERP is a student information system, i.e. a school management information system currently developed by Capita. It is the most widely used MIS in UK schools, claiming over 80% market share across the primary and secondary sectors. School ERP uses a client-server architecture; the back-end service is based around Microsoft SQL Server with some business logic handled by a custom.

This module allows users to do the following actions:

- The school administration module is the most important part of the school. Manage school day-to-day activities.
- Admission module provides a student admission process in four simple steps which are Form.
- Maintain finance of school is very difficult for the school also fees collection of the student is the most.
- Financial management is the most tedious task for any organization.

Our Portfolio: <https://toxsl.com/portfolio/>

1.2 Design Goals

The module should be designed in such a way, that users will find it easy and intuitive to use. The module should be easy to navigate and understand. An efficient design is especially important, because if users are unable to use the module, then a major project goal may be left unfulfilled, namely to provide an effective platform to support collaboration amongst the group members.

2 Scope & Objectives

2.1 Scope

The objective of developing such a computerization system is to reduce paperwork and save time in school management.

KEY FEATURES:

- **Student Record:** You can easily find out the detail of the student.
- **School Fees:** You can easily find out the fee structure of every class.
- **Faculty Profile:** You can easily find out the description of the teacher posted in the school.
-

- **Time-Table:** You can search out the name of the teacher and subject in a particular class at a particular time.
- **Examination Result:** You can check the performance of students during the particular year.
- **Library Management:** You can update the library database.

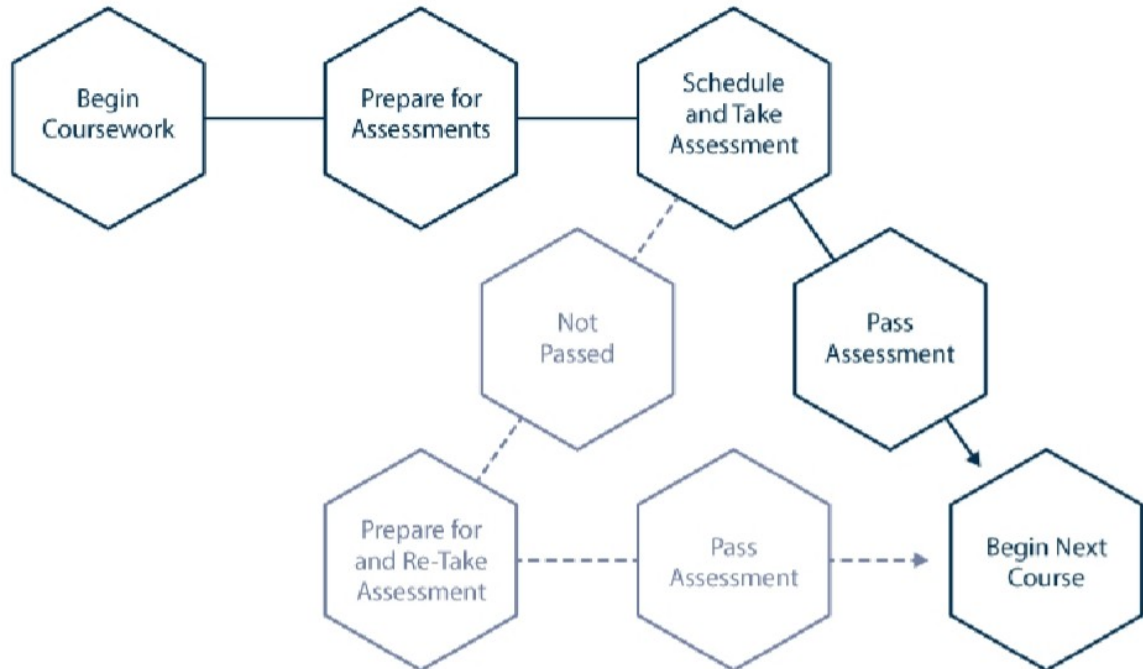

2.2 Objectives

- Maintaining student records
- Automatic preparation of mark sheets
- Automatic updates of student TC
- Library Management

2.3 Primary Focus

- Our primary focus is PHP, Android, and iPhone Applications:
- Website Theme Design & Customization
- Development of Responsive Website
- Android Application
- iOS App
- Complete source code of the project after the completion of the project
- Development & Database Design
- Walk-through of the back-end for Admin Panel via Skype

3. Flow-Diagrams

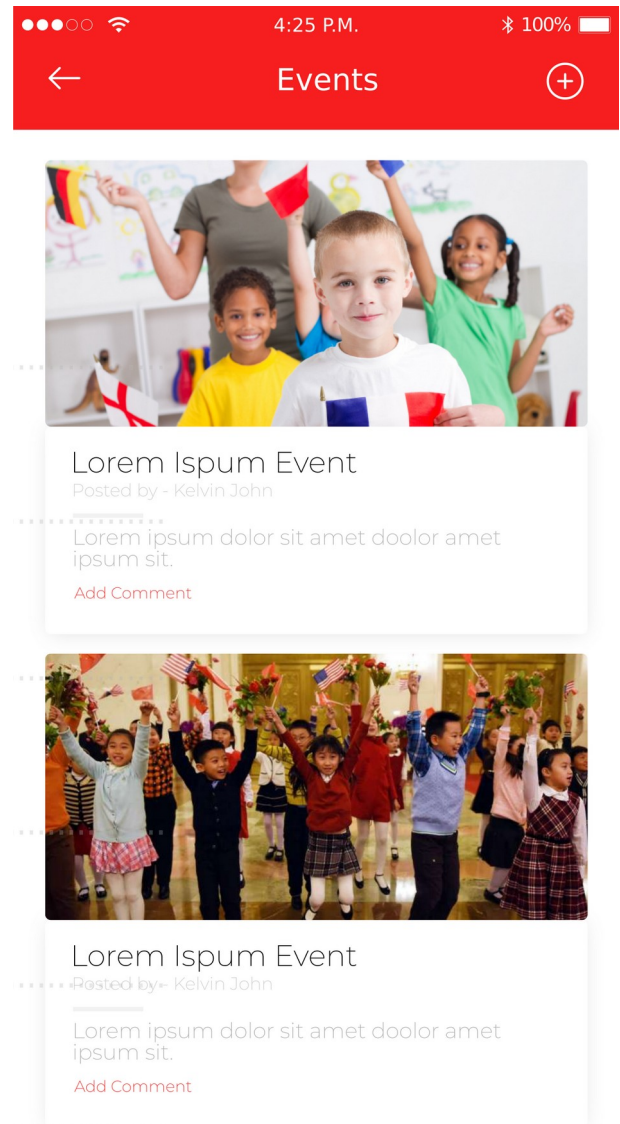

4. Applications Developed:

4.1 Skooleo

It is a school management platform that helps the schools to manage the academic process and access to quality education with a digital experience. It keeps the parents, students, and children in the loop.

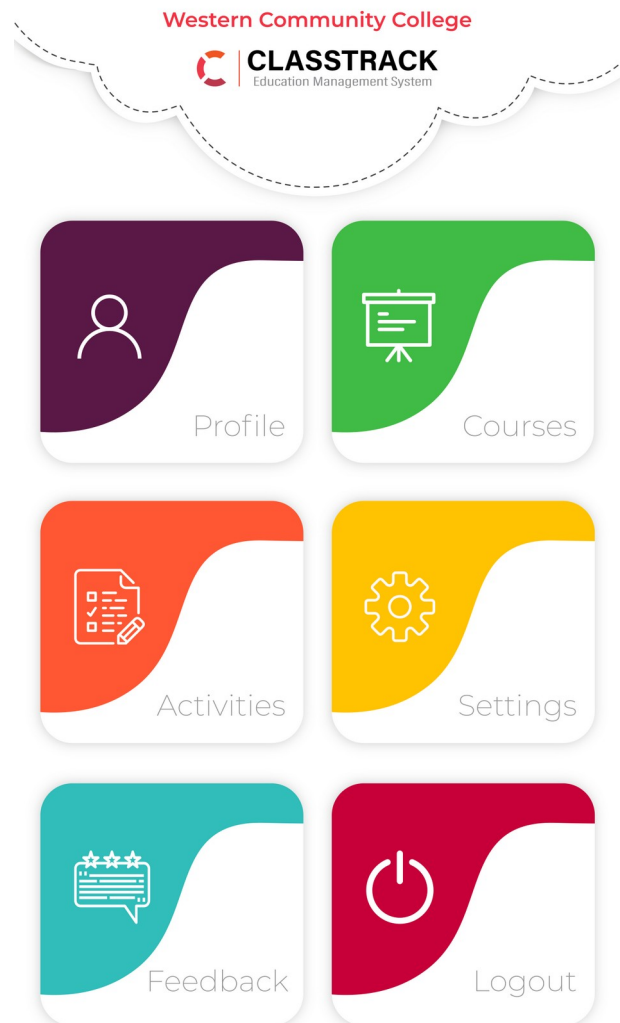

Screenshot:
