# 1 Introduction

## 1.1 Background

Taxi apps allow users easy access, user-friendly experience to the book, track and compare taxi prices in real-time. The taxi applications are designed and developed for taxi drivers and passengers. From bustling big cities to sleepy small towns, taxi drivers play an important role in transporting people from one location to another.

This module allows the user to do the following actions:

- Allow passengers to signup in the booking applications.
- Then, passengers will be able to select cars based (SUV, Sidan, Hatchback) as per the requirements.
- The list of Divers shown in the application, selects & proceeds with the journey.
- On the other hand, the Driver signup into the application and see, the requests of the Passenger and reach to passenger destination & complete the journey.

**Our Portfolio:** <https://toxsl.com/portfolio/>

## 1.2 Design Goals

The module should be designed in such a way, that users will find it easy and intuitive to use. The module should be easy to navigate and understand. An efficient design is especially important, because if users are unable to use the module, then a major project goal may be left unfulfilled, namely to provide an effective platform to support collaboration amongst group members.

# 2. Scope & Objectives

## 2.1 Scope

The app dispatches a taxi in just a few taps for safe taxi rides. Order a cab – your order is sent directly to the drivers in your area, so they reach you as quickly as possible.

### KEY FEATURES:

- **Advance Booking:-** You can book in advance before leaving anywhere.
- **One touch booking:** Simply open the app and click on ‘book.’
- **Meter Rates:-** Drivers can set their default meter rates and get fare quotes in the app according to vehicles. (SUV, Sedan, Limousine, VIP, etc.)

- **Location:** - Track your location through GPRS in real-time.
  - or Manually edit or select your location.
  - Confirm your location and tap “Request taxi.”
- **Map Feature:** - Track the cabs driver coming your way on the map.
  - or call him directly.
  - See your ride en-route on the map.
- **Know your driver:** Once you book a taxi cab, you get detailed information about your driver.
- **Payment options:** There is an integrated payment gateway that allows you to pay digitally or by Braintree. It also supports multicurrency.
- **Rating:-** Client helps us to serve better.
- **Safer:-** Set a destination to calculate the fare and the arrival time while tracking the driver's identity and cab info. We thoroughly screen and train each driver to ensure that only those with clear history and best skills became our partners.
- **Social media integration:-** User can log in through Facebook, LinkedIn, or Google.

## 2.2 Objectives

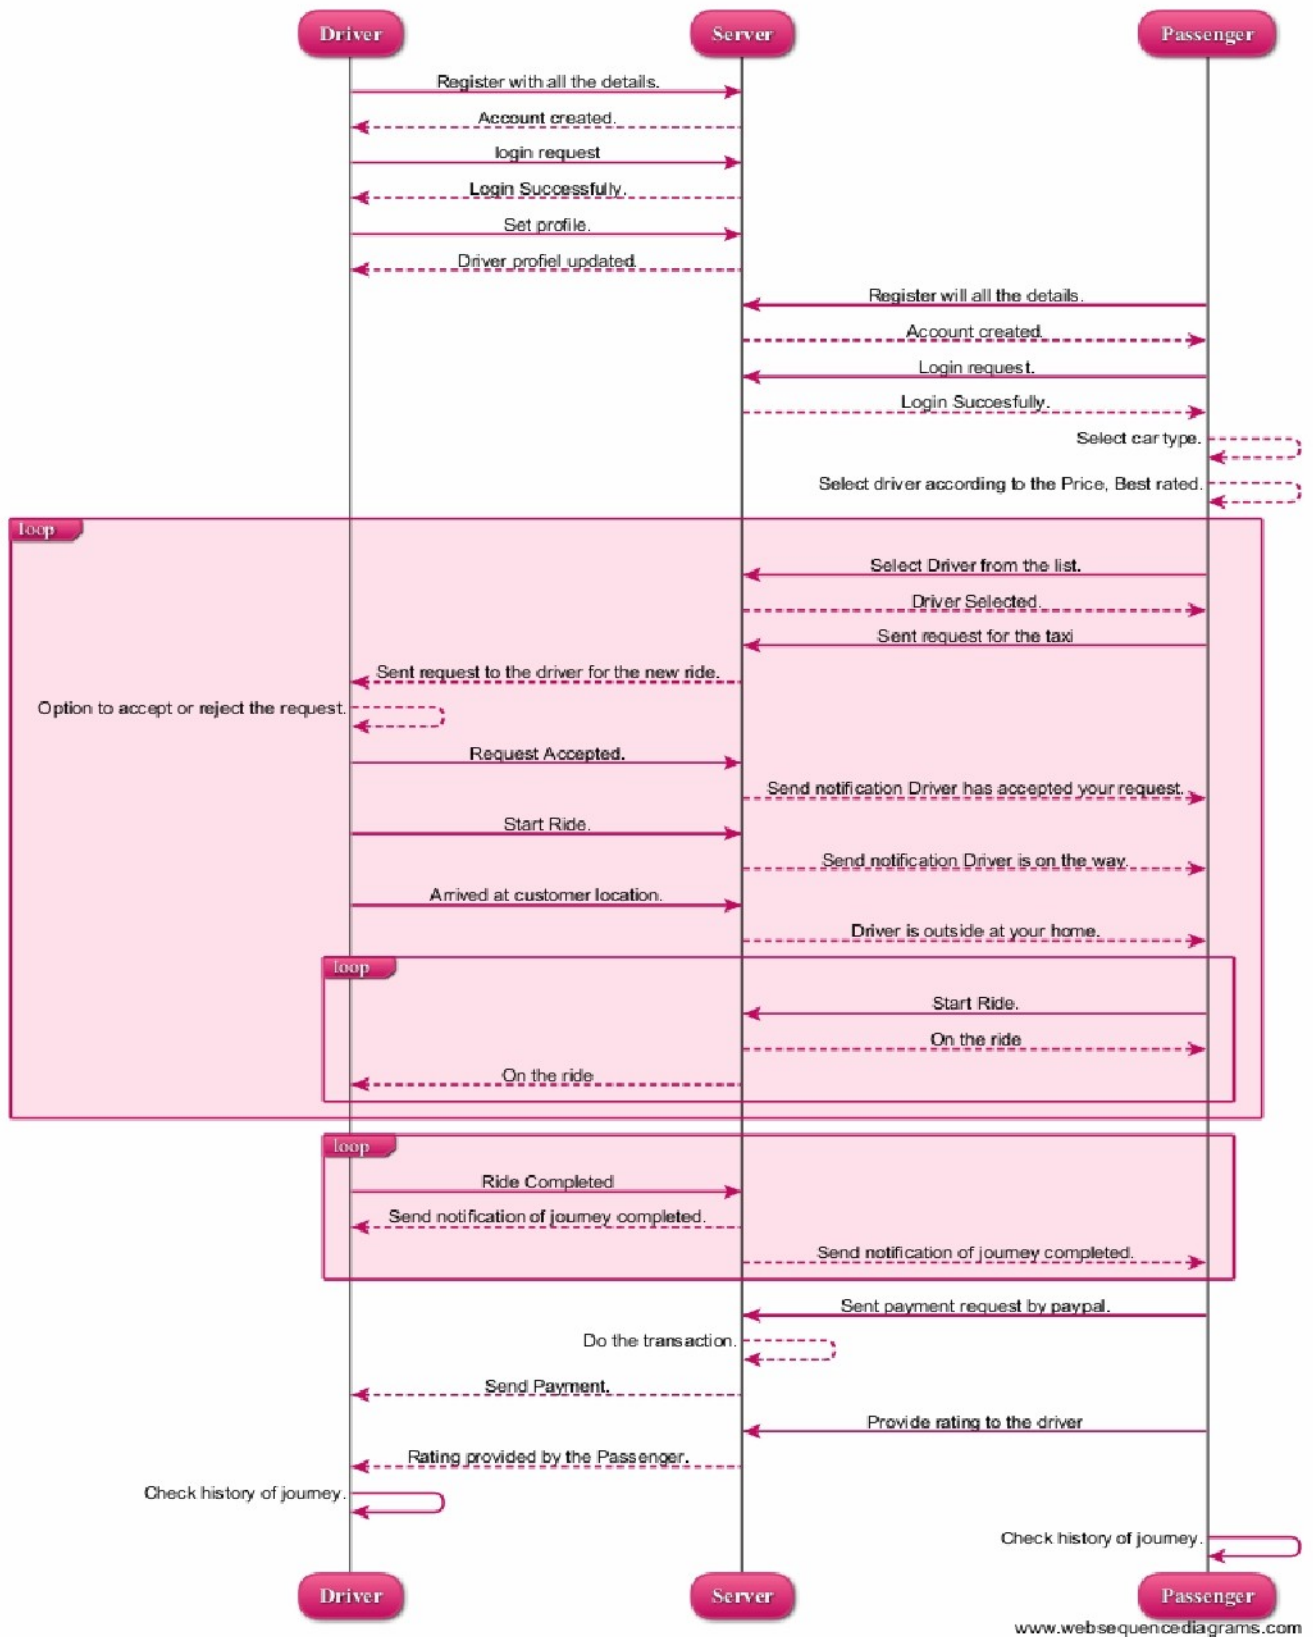

- Provide a cost-effective, comfortable, safe, and secure transport system.
- To provide customers a safe ride.
- Easy to navigate & understand.
- Provide an efficient mechanism for managing applications.
- Minds to meet the business objectives of our client/customer.

## 2.3 Primary Focus

Our primary focus is PHP, Android, and iPhone Applications:-

- Website Theme Design & Customization
- Development of Responsive Website.
- Android Application
- iOS App
- Complete the source code of the project after the completion of the project.
- Development & Database Design
- Walk-through of the back-end for Admin Panel via Skype

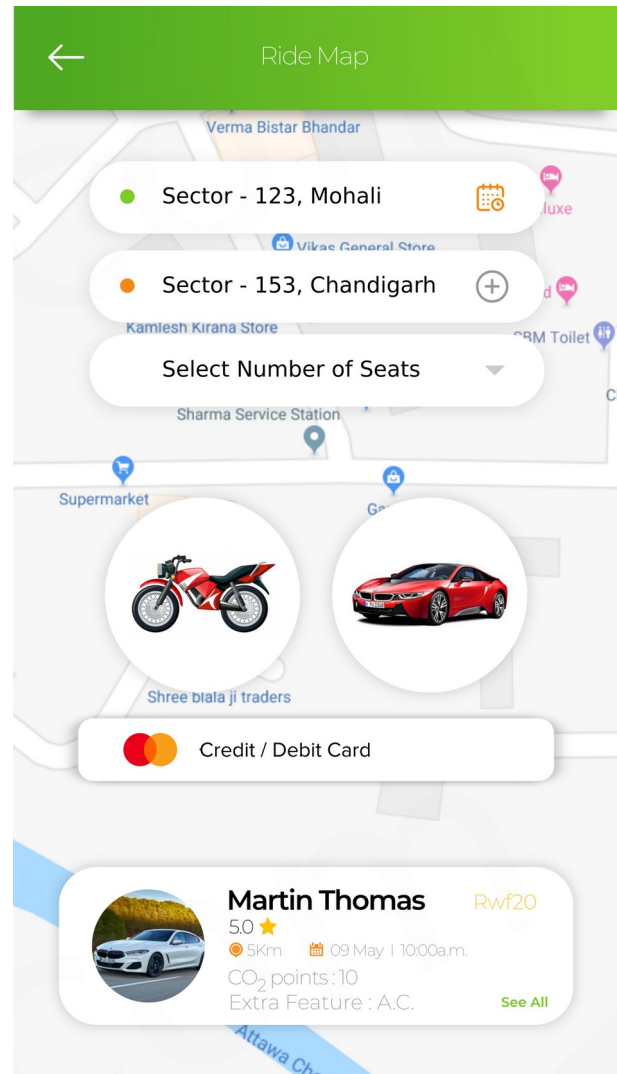

### 3. Sequence Diagrams
