**Make An Impact And Scale
Your Business Operations
With Our Interactive &
Feature-Rich Solution**

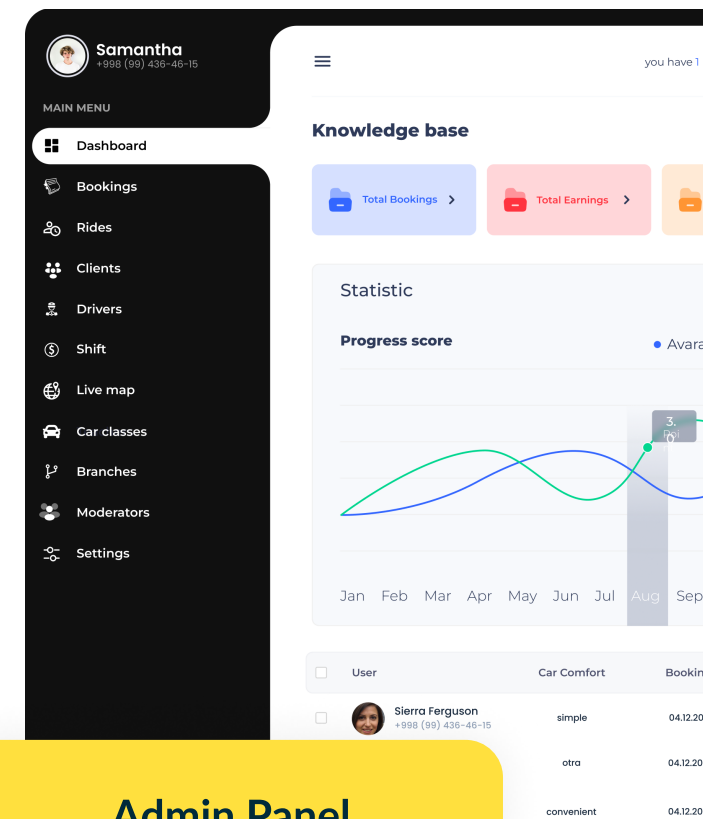

Customer App

Allow users to communicate effectively with our interactive interface and user-friendly taxi app solution.

Driver App

Track your drivers' booking records and earnings in real-time with our premium taxi app solution.

Admin Panel

Manage and track the status of all transactions with our robust admin panel in real-time.

Bring Your Taxi Services To Users Through A Taxi Booking App

Grow your taxi booking business with our
customizable & robust taxi booking software.

Customer App

Top-notch Features

Top-Notch Features

Trip History

Users are allowed to check the past trips that they took with the taxi booking app. The taxi app's history saves all the information, such as date, fare, timings, etc.

Business Profile

Our taxi booking app solution allows users to keep their business and personal rides separate. This helps users get reimbursement easily.

Cancel Booking

Users are free to cancel their rides at any time in case of a change in schedule.

Refer and Earn

Users can earn extra rewards from the app by referring it to their family and friends.

Multiple Payments

Offering multiple payment methods enables users to conveniently choose the payment option that suits them best when paying for rides.

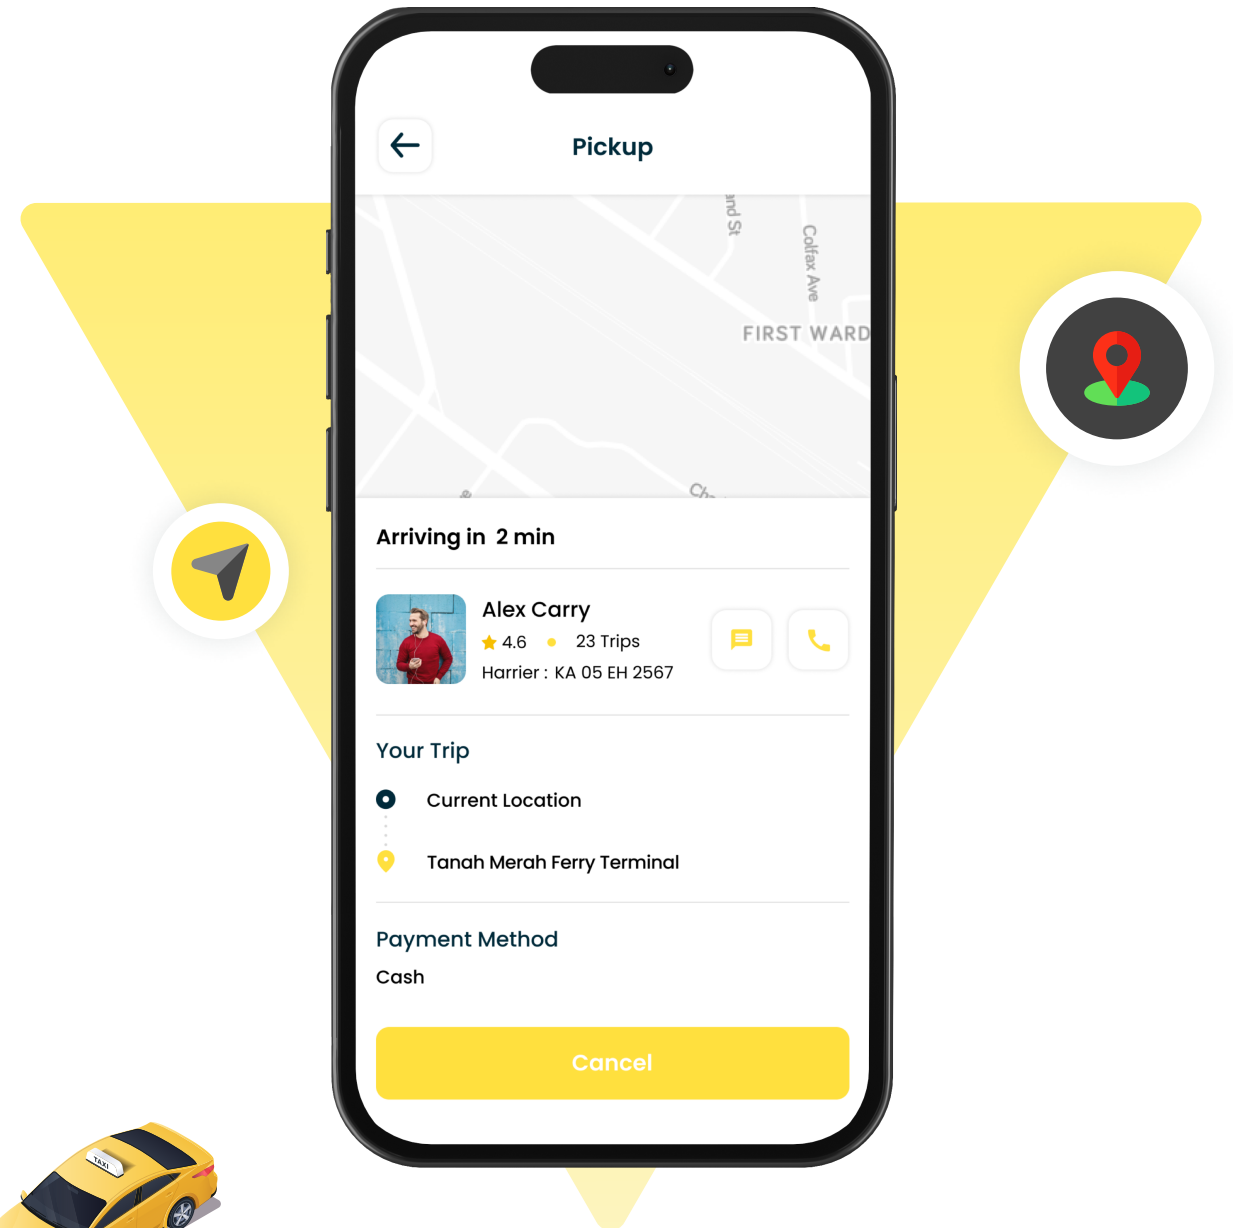

Help and Support

We offer 24/7 customer support for any issues or emergencies faced by users. Also, chat support with the drivers is available.

Maintain Transparency With Our Premium Taxi Booking Solution

Tell your customers the exact time of arrival and save them time. It shows that you value your customer and their precious time.

Book Now

A user can request a ride at any time from their current location to any destination.

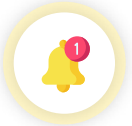

Book Later

Users can schedule their trips in advance, and the cab will show up at the specified time and location.

Book for Others

Users are free to schedule a taxi at any moment for their family or friends.

Text Notification

Users are sent text alerts about the ride. This keeps them alert and updated about the ride.

Fare Estimation

A fare estimate for the trip is provided when users enter their pick-up and drop-off locations.

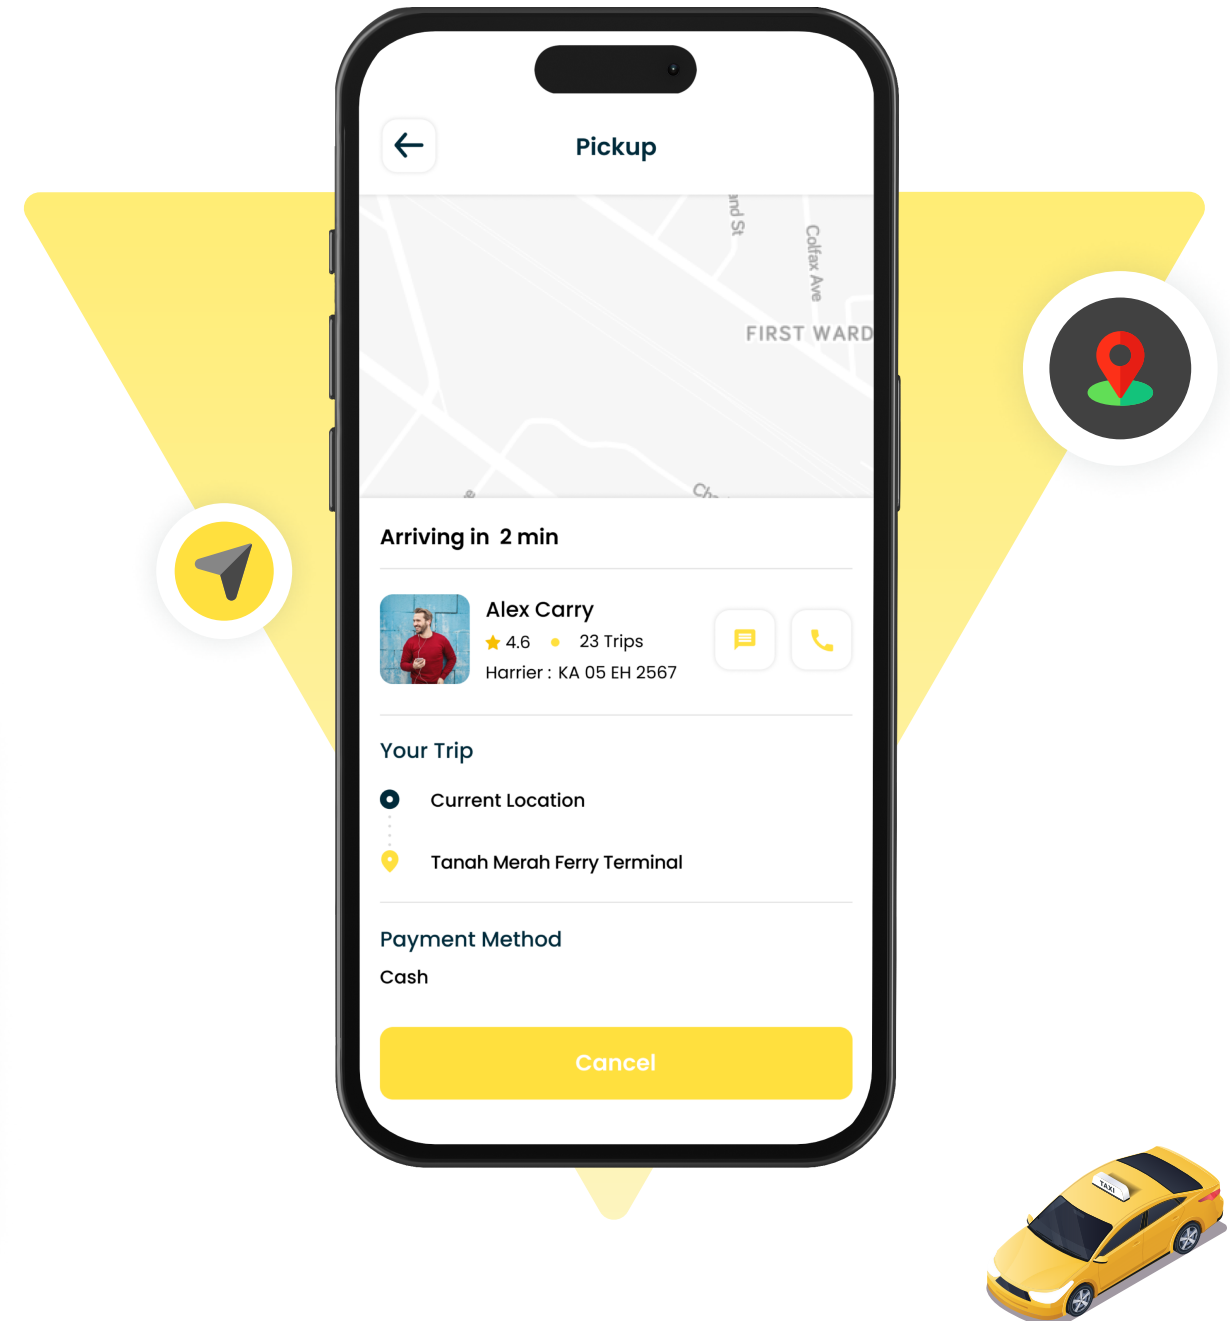

Driver Details

Users are sent the cab driver's details. This helps them stay in touch with the driver and communicate effectively.

Promo code

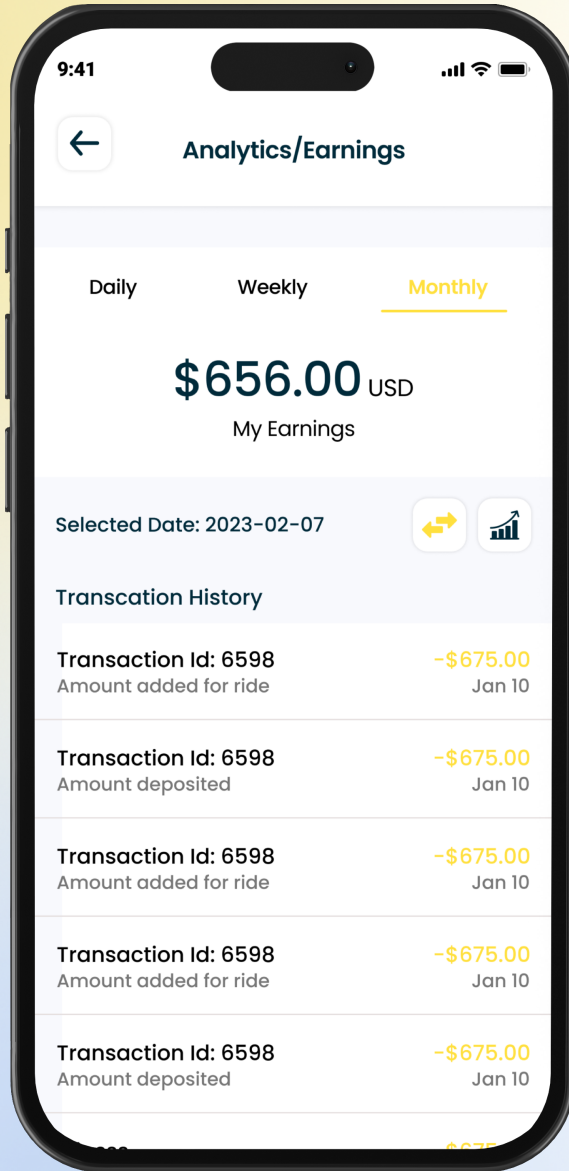

Users can get discounts on their rides by using the promo codes. This helps them save money.

Driver App

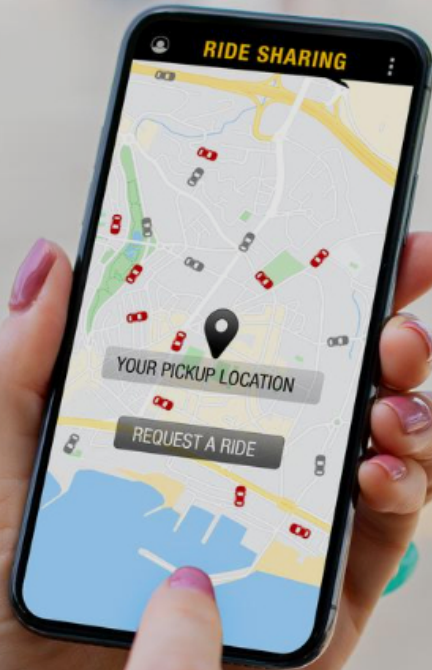

Top-notch Features

Payments Transparency

Maintain transparency among drivers. They can easily check their ride history and how much they made.

Top-Notch Features

Ride Request

Drivers receive notifications from the app once they receive ride requests from their nearby areas.

Ride Ratings

Drivers are allowed to rate their customer trip experience using the app.

SOS Button

Drivers can send notifications to the admin in case of emergency.

Document Verification

Drivers must add the crucial documents needed for the app. This is done to verify and approve their authenticity.

Chat Support

Drivers can chat with customers and admin in real-time. This helps maintain seamless communication.

Accept/Reject Ride

Allow drivers to accept or reject the incoming ride as per their comfort.

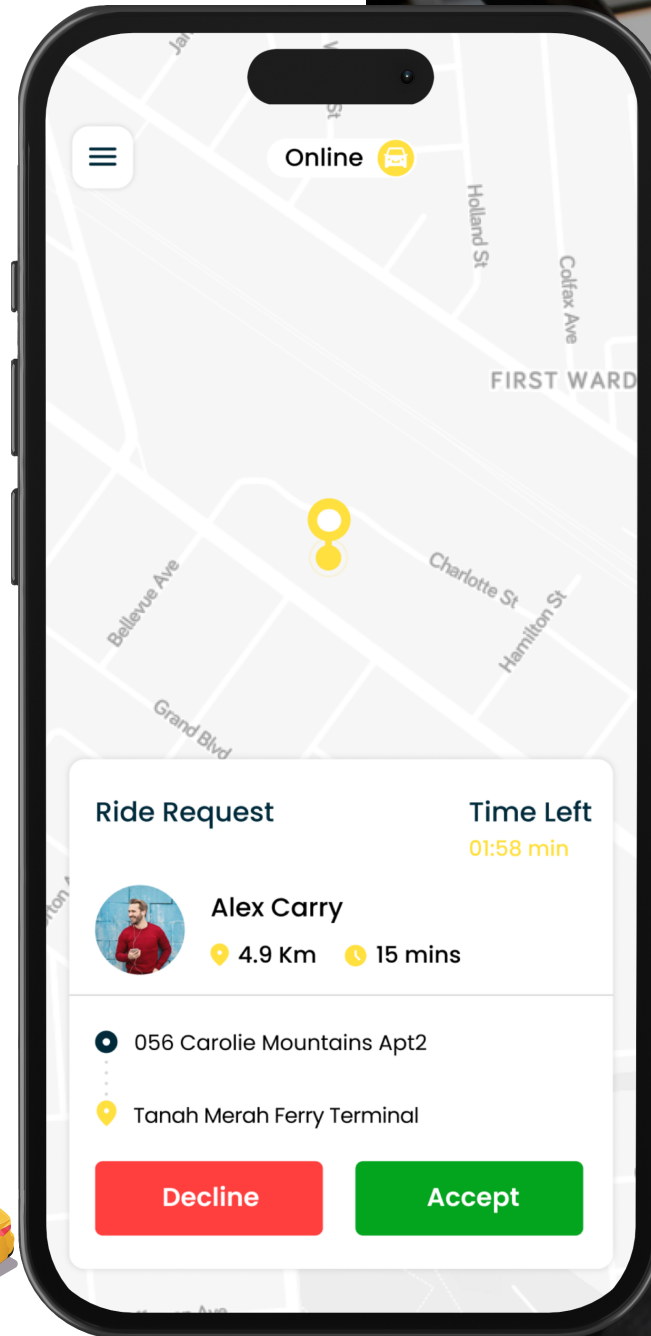

Notify Drivers

Drivers get real-time notifications from the users who booked the ride.

Payment

The drivers get payment once the ride is completed by the user.

Admin Panel

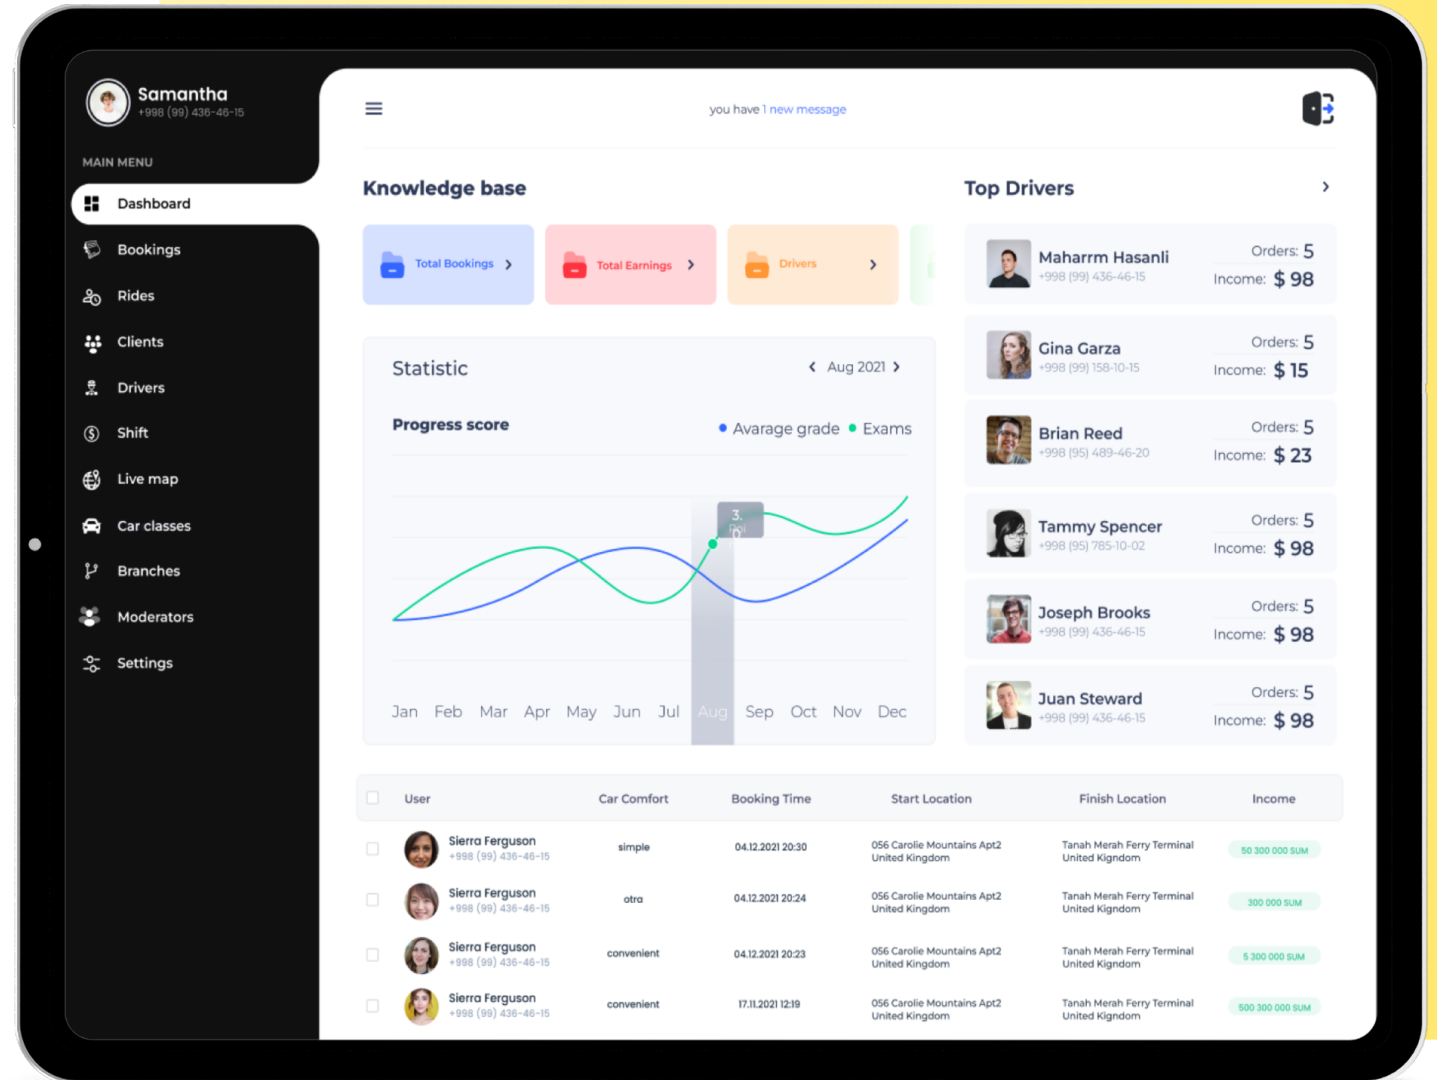

Leading-Edge Features

Interactive Dashboard

Use the app anytime, anywhere with its interactive dashboard and get business insights in real time.

Leading-Edge Features

Reports & Analytics

Get business insights in real time and know how your business is performing in the market. This data can help you do better.

Monitor Rides

Admin can check the status of all rides whether the ride is in a pending state or active.

Ride Tracking

Track the location of the driver, and check the cab's status and mode of payment for all rides.

Driver's Status

Admin can check the status of the driver. This helps them know the driver's availability.

Location Tracking

Admin can search for the driver's trip location. This helps you stay updated with the driver's present location.

Feedback

Admin can check the feedback given by customers to the driver. This helps them ensure that customers are comfortable with the driver.

Dynamic Pricing

Get a controlled dynamic pricing system and handle demand and supply mismatch.

Pricing Slab

Offer a fixed pricing slab of the customers' choice and let them pay the drivers accordingly.

Booking Management

Admin can check the status of the booking and are authorized to update the states if needed.

Manage Taxi Categories

Admin has the flexibility to manage the Taxi categories and decide which category will be displayed to the customers.

Wallet

Admin can check the total payment to be received from customers through various payment methods.

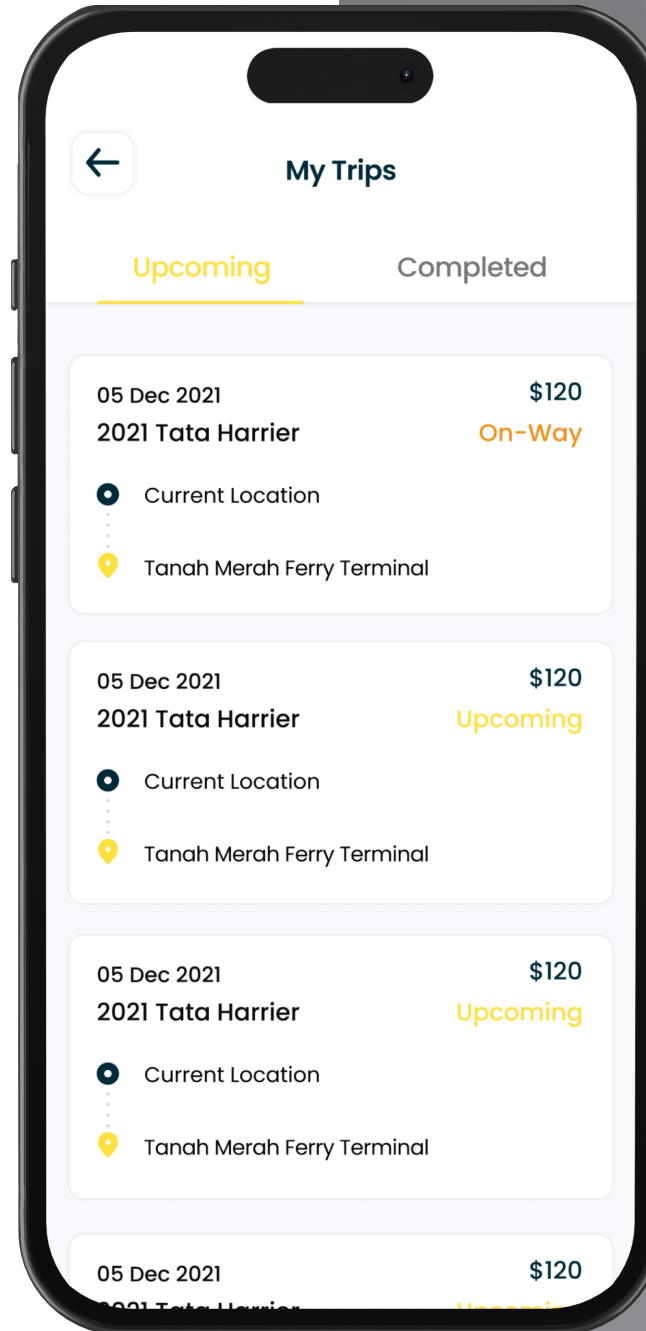

Discounts

Admin is authorized to create and share various discounts and offers for the customers.

Cancellation Fees

Customers are charged cancellation fees for every canceled ride from their side.

Transform Your Business With Uber-Like Taxi Booking Platform

Develop an efficient, scalable, and
top-notch Taxi Booking App.
