1 Introduction

1.1 Background

Social networking sites are becoming extremely popular by providing a new way of information sharing and knowledge dissemination. Also, they are being identified as the popular channels for getting prepared for a disaster. In this project, we are aiming to create a social networking application that plays a reliable source of information about an individual.

Our Portfolio: <u>https://toxsl.com/portfolio/</u>

1.2 Design Goals

The module should be designed in such a way, that users will find it easy and intuitive to use. The module should be easy to navigate and understand. An efficient design is especially important, because if users are unable to use the module, then a major project goal may be left unfulfilled, namely to provide an effective platform to support collaboration among group members.

1.3 Project Scope

A social-networking project that is to chat with each other, share photos/videos with friends as well as event booking and ticketing also.

2 Key Features

2.1 Free web space – Each member is provided free web space to publish content.

2.2 Free web address – Each member gets a unique web address that becomes the identity of that individual or business. The members can then use their web address or URL to promote themselves or their business.

2.3 Build conversations – Content posted by members can be browsed and commented upon by all members who form part of the community. Content can also be tagged from third-party sites on subjects that interest the group.

2.4 Chat client – Most Social Networking Sites have chat clients and members who can chat with each other in real-time.

2.5 E-mail – Members can send e-mails to each other. The Social Networking Sites also send e-mail alerts whenever a member is tagged in a third-party post. This enables members to learn when a fellow member has connected to them.

3 Flow-Diagrams

4 Applications Developed

4.1 GodScoop

GodScoop is a Christian social media platform that connects users with others around the world so that they can enjoy many of the benefits the social media platforms provide—just without the negativity and toxic environment.

Screenshot:

4.2 Australia Market

Australian market platform is a comparison platform having functionalities like chat, social media integration, promotion rewards functionality.

4.3 Social community

Social community site provides easy to use community platform where users from the different region can register, learn and teach the different regional languages to and from the friends.
